DETAILED ACTION

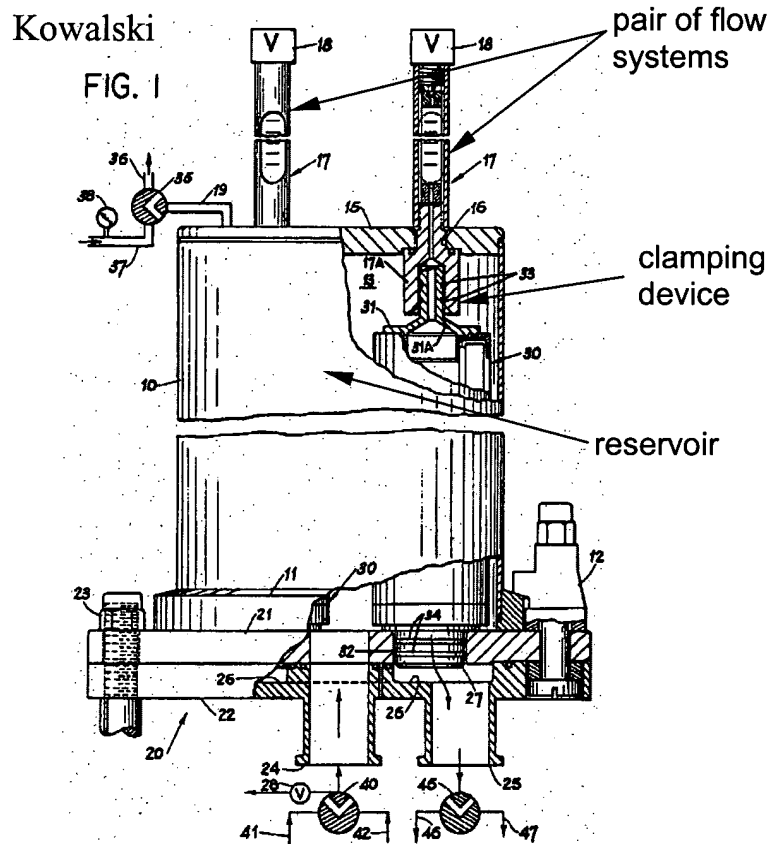

Response to Arguments

1. Applicant's arguments, see pages 11, lines 3-22, and page 12, lines 1-13, filed 22 July 2004, with respect to claims 1 and 6, respectively, have been fully considered and are persuasive. The rejection of claims 1-6 has been withdrawn.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance: The primary reasons for allowance of the claims is the inclusion of limitations of a differential permeameter and method of determining the permeability of a sample employing such a differential permeameter, including a pair of flow systems, a reservoir, a fan, clamping devices disposed within each flow system to hold a porous sheet, a pair of orifice plates for creating/adjusting a pressure drop, and measuring that pressure drop to obtain a pressure differential measurement. The closest reasonable Prior Art reference is US 4,384,474 to Kowalski (see Fig. 1 below) which discloses a testing system for filters having a pair of flow systems, however, does not disclose the differential pressure measurements to be made.
